Pro/ENGINEER Wildfire 5.0 Mechanica Tutorial (Structure/Thermal)

Roger Toogood

Pro/ENGINEER Wildfire 5.0 Mechanica Tutorial (Structure/Thermal) Roger Toogood

Pro/ENGINEER Wildfire 5.0 Mechanica Tutorial (Structure/Thermal) introduces new users to finite element analysis using Pro/ENGINEER Mechanica and how it can be used to analyze a variety of problems. The tutorial lessons cover the major concepts and frequently used commands required to progress from a novice to an intermediate user level. The commands are presented in a click-by-click manner using simple examples and exercises that illustrate a broad range of the analysis types that can be performed. In addition to showing the command usage, the text will explain why certain commands are being used and, where appropriate, the relation of commands to the overall FEA philosophy are explained. Moreover, since error analysis is an important skill, considerable time is spent exploring the created models so that users will become comfortable with the debugging phase of modeling.

This textbook is written for first-time FEA users (in general) and MECHANICA users (in particular). After a brief introduction to finite element modeling, the tutorial introduces the major concepts behind the use of Pro/MECHANICA to perform Finite Element Analysis of parts. These include: modes of operation, element types, design studies (analysis, sensitivity studies, organization), and the major steps for setting up a model (materials, loads, constraints, analysis type), studying convergence of the solution, and viewing the results. Both 2D and 3D problems are treated.

Table of Contents

1. Introduction to the Tutorials
2. Finite Element Modeling with MECHANICA
3. Solid Models (Part 1)
4. Solid Models (Part 2)
5. Plane Stress and Plane Strain Models
6. Axisymmetric Solids and Shells
7. Shell Models
8. Beams and Frames
9. Miscellaneous Topics
10. Thermal Models

From reader reviews:

Cindy Gross:

The book Pro/ENGINEER Wildfire 5.0 Mechanica Tutorial (Structure/Thermal) can give more knowledge and information about everything you want. Why must we leave the good thing like a book Pro/ENGINEER Wildfire 5.0 Mechanica Tutorial (Structure/Thermal)? A few of you have a different opinion about publication. But one aim which book can give many information for us. It is absolutely suitable. Right now, try to closer using your book. Knowledge or details that you take for that, you may give for each other; it is possible to share all of these. Book Pro/ENGINEER Wildfire 5.0 Mechanica Tutorial (Structure/Thermal) has simple shape but the truth is know: it has great and massive function for you. You can look the enormous world by open and read a publication. So it is very wonderful.

Lila Smith:

In this 21st hundred years, people become competitive in every way. By being competitive now, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Yeah, by reading a publication your ability to survive increase then having chance to endure than other is high. In your case who want to start reading the book, we give you that Pro/ENGINEER Wildfire 5.0 Mechanica Tutorial (Structure/Thermal) book as beginner and daily reading e-book. Why, because this book is greater than just a book.

Lavada Rowlett:

Spent a free a chance to be fun activity to perform! A lot of people spent their spare time with their family, or their own friends. Usually they doing activity like watching television, gonna beach, or picnic from the park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your personal free time/ holiday? Can be reading a book can be option to fill your cost-free time/ holiday. The first thing you ask may be what kinds of publication that you should read. If you want to try out look for book, may be the publication untitled Pro/ENGINEER Wildfire 5.0 Mechanica Tutorial (Structure/Thermal) can be fine book to read. May be it can be best activity to you.

Leonie Blazek:

Is it you actually who having spare time and then spend it whole day through watching television programs or just telling lies on the bed? Do you need something new? This Pro/ENGINEER Wildfire 5.0 Mechanica Tutorial (Structure/Thermal) can be the solution, oh how comes? The new book you know. You are and so out of date, spending your spare time by reading in this brand-new era is common not a geek activity. So what these ebooks have than the others?
