Una Nueva Solución para el SCI: Las bacterias-el eslabón perdido en el tratamiento del síndrome del colon irritable (Spanish Edition) Mark Pimentel M.D.

A New IBS Solution offers a revolutionary look at the way Irritable Bowel Syndrome (IBS) is currently being treated. Today, over 60 million people of all ages across the country are suffering from IBS, which is characterized by abdominal pain, bloating, and altered bowel habits. But because patients may find it difficult to discuss their bowel problems with their physicians, they often suffer in silence or even worse, “learn to live with it.”

According to Dr. Mark Pimentel, Director of the Gastrointestinal Motility Program at Cedars-Sinai Medical Center, the majority of IBS cases can be treated successfully. Dr. Pimentel believes that the root cause of most IBS symptoms can be attributed to an overgrowth of bacteria in the small intestine. A New IBS Solution takes you through the historical evolution of conventional medicine's view on IBS in a way that can be easily understood. In addition, Dr. Pimentel presents a simple treatment protocol that will not only help you resolve your IBS symptoms, but will also prevent their recurrence.
