Caleb E. Finch

Longevity, Senescence, and the Genome (The John D. and Catherine T. MacArthur Foundation Series on Mental Health and De) Caleb E. Finch

Featuring extensive references, updated for this paperback edition, *Longevity, Senescence, and the Genome* constitutes a landmark contribution to biomedicine and the evolutionary biology of aging.

To enhance gerontology's focus on human age-related dysfunctions, Caleb E. Finch provides a comparative review of all the phyla of organisms, broadening gerontology to intersect with behavioral, developmental, evolutionary, and molecular biology. By comparing species that have different developmental and life spans, Finch proposes an original typology of senescence from rapid to gradual to negligible, and he provides the first multiphyletic calculations of mortality rate constants.
