Hardbound. This volume presents a balanced and representative overview of the major developments and trends in Traffic and Transport Psychology. Traffic and Transport Psychology covers an enormously diverse field with many different theoretical and methodological approaches. Driver behaviour theories are, as yet, fragmented. Some theories focus on performance aspects, some on risk management and some on the social context. The first part of the book presents arguments for integrated models, for alternative paradigms and for a blatant atheoretical approach to driver behaviour. In addition, two chapters are devoted to novel methodological approaches to studying driver behaviour. In the second part, driver performance is the central issue, centred around three themes: perception, cognition and workload. The third part deals with social factors. It reflects the considerable development that has been made in recent years in the area of attitude meas
