Big Data: Algorithms, Analytics, and Applications (Chapman & Hall/CRC Big Data Series)

Big Data: Algorithms, Analytics, and Applications (Chapman & Hall/CRC Big Data Series)

As today's organizations are capturing exponentially larger amounts of data than ever, now is the time for organizations to rethink how they digest that data. Through advanced algorithms and analytics techniques, organizations can harness this data, discover hidden patterns, and use the newly acquired knowledge to achieve competitive advantages.

Presenting the contributions of leading experts in their respective fields, **Big Data: Algorithms, Analytics, and Applications** bridges the gap between the vastness of Big Data and the appropriate computational methods for scientific and social discovery. It covers fundamental issues about Big Data, including efficient algorithmic methods to process data, better analytical strategies to digest data, and representative applications in diverse fields, such as medicine, science, and engineering. The book is organized into five main sections:

1. *Big Data Management*?considers the research issues related to the management of Big Data, including indexing and scalability aspects
2. *Big Data Processing*?addresses the problem of processing Big Data across a wide range of resource-intensive computational settings
3. *Big Data Stream Techniques and Algorithms*?explores research issues regarding the management and mining of Big Data in streaming environments
4. *Big Data Privacy*?focuses on models, techniques, and algorithms for preserving Big Data privacy
5. *Big Data Applications*?illustrates practical applications of Big Data across several domains, including finance, multimedia tools, biometrics, and satellite Big Data processing

Overall, the book reports on state-of-the-art studies and achievements in algorithms, analytics, and applications of Big Data. It provides readers with the basis for further efforts in this challenging scientific field that will play a leading role in next-generation database, data warehousing, data mining, and cloud computing research. It also explores related applications in diverse sectors, covering technologies for media/data communication, elastic media/data storage, cross-network media/data fusion, and SaaS.

From reader reviews:

Della Bailey:

Do you have favorite book? In case you have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each publication has different aim or goal; it means that guide has different type. Some people experience enjoy to spend their time to read a book. They are really reading whatever they take because their hobby will be reading a book. How about the person who don't like reading a book? Sometime, man or woman feel need book if they found difficult problem or even exercise. Well, probably you should have this Big Data: Algorithms, Analytics, and Applications (Chapman & Hall/CRC Big Data Series).

Freddy Lamberth:

What do you with regards to book? It is not important along with you? Or just adding material when you require something to explain what your own problem? How about your time? Or are you busy man? If you don't have spare time to do others business, it is make you feel bored faster. And you have spare time? What did you do? Everyone has many questions above. They must answer that question simply because just their can do this. It said that about book. Book is familiar on every person. Yes, it is proper. Because start from on kindergarten until university need this specific Big Data: Algorithms, Analytics, and Applications (Chapman & Hall/CRC Big Data Series) to read.

Lisa Shumaker:

Reading can called thoughts hangout, why? Because while you are reading a book specially book entitled Big Data: Algorithms, Analytics, and Applications (Chapman & Hall/CRC Big Data Series) the mind will drift away trough every dimension, wandering in each aspect that maybe unidentified for but surely can become your mind friends. Imaging every word written in a guide then become one type conclusion and explanation which maybe you never get before. The Big Data: Algorithms, Analytics, and Applications (Chapman & Hall/CRC Big Data Series) giving you a different experience more than blown away your thoughts but also giving you useful data for your better life in this particular era. So now let us present to you the relaxing pattern this is your body and mind will likely be pleased when you are finished reading through it, like winning an activity. Do you want to try this extraordinary investing spare time activity?

Alma Medina:

Reading a publication make you to get more knowledge from this. You can take knowledge and information from a book. Book is composed or printed or descriptive from each source that will filled update of news. Within this modern era like currently, many ways to get information are available for you. From media social like newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just trying to find the Big Data: Algorithms, Analytics, and Applications (Chapman & Hall/CRC Big Data Series) when you

needed it?
