Computational Models in Political Economy

Computational Models in Political Economy

Researchers are increasingly turning to computational methods to study the dynamic properties of political and economic systems. Politicians, citizens, interest groups, and organizations interact in dynamic, complex environments, and the static models that are predominant in political economy are limited in capturing fundamental features of economic decision making in modern democracies. Computational models--numerical approximations of equilibria and dynamics that cannot be solved analytically--provide useful insight into the behavior of economic agents and the aggregate properties of political systems. They serve as a valuable complement to existing mathematical tools. This book offers some of the latest research on computational political economy. The focus is on theoretical models of traditional problems in the field. Each chapter presents an innovative model of interaction between economic agents. Topics include voting behavior, candidate position taking, special interest group contributions, macroeconomic policy making, and corporate decision making.

From reader reviews:

Paul Howell:

This Computational Models in Political Economy book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is actually information inside this publication incredible fresh, you will get details which is getting deeper you read a lot of information you will get. This kind of Computational Models in Political Economy without we understand teach the one who looking at it become critical in pondering and analyzing. Don't possibly be worry Computational Models in Political Economy can bring if you are and not make your case space or bookshelves' turn into full because you can have it inside your lovely laptop even mobile phone. This Computational Models in Political Economy having great arrangement in word and layout, so you will not truly feel uninterested in reading.

David Shields:

Now a day folks who Living in the era everywhere everything reachable by interact with the internet and the resources within it can be true or not call for people to be aware of each facts they get. How individuals to be smart in obtaining any information nowadays? Of course the answer then is reading a book. Examining a book can help men and women out of this uncertainty Information mainly this Computational Models in Political Economy book because this book offers you rich details and knowledge. Of course the information in this book hundred percent guarantees there is no doubt in it as you know.

Alta Favors:

Reading a book for being new life style in this calendar year; every people loves to study a book. When you learn a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what types of book that you have read. In order to get information about your review, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these us novel, comics, as well as soon. The Computational Models in Political Economy will give you new experience in reading through a book.

Houston Estes:

Some people said that they feel weary when they reading a e-book. They are directly felt that when they get a half parts of the book. You can choose the actual book Computational Models in Political Economy to make your personal reading is interesting. Your own skill of reading proficiency is developing when you including reading. Try to choose easy book to make you enjoy you just read it and mingle the opinion about book and reading especially. It is to be first opinion for you to like to available a book and go through it. Beside that the reserve Computational Models in Political Economy can to be your brand-new friend when you're sense alone and confuse with the information must you're doing of these time.
