More Than a Theory (Reasons to Believe): Revealing a Testable Model for Creation Hugh Ross

"*More Than a Theory* provides a valuable overview of the many explanations of nature and human origins that compete for acceptance in modern culture. Rather than limiting this comparison to a single field such as biology, Hugh Ross compares these explanations with respect to their ability to adequately account for over 100 distinct findings from natural and social sciences. Ross effectively argues that by imposing artificial and unnecessary restraints on scientific inquiry, science loses its claim as a search for truth and simultaneously makes science less attractive to inquiring young minds. Removing those constraints unleashes the power of unbiased exploration in the quest for truth."--Carl A. Koval, professor of chemistry, University of Colorado

"The more we discover about the universe, the more I appreciate our Creator. And that's why I'm grateful for Hugh Ross. This book will not only expand your appreciation of God, it will stretch your faith."--Mark Batterson, lead pastor, National Community Church; author, *Wild Goose Chase*

"To all who think that belief in a Creator requires a blind leap of faith, this book serves strong notice otherwise! The Creation Model is not only testable, it passes multiple scientific tests with flying colors. Read *More Than a Theory* yourself to see how Hugh Ross wields data, logic, and evidence to make a powerful and convincing case."--Mark Mittelberg, author, *Choosing Your Faith*, and coauthor, *The Unexpected Adventure*
