## **Joint Special Operations Tactical Medical Emergency Protocol Formulary: Including Algorithm-Directed Troop Medical Care** USSOCOM OFFICE OF THE COMMAND SURGEON PREFACE

The following is a list of medications mentioned in the Tactical Medical Emergency Protocols. However, most of the TMEPs have a preferred medication recommendation and then an alternate one. All of these recommendations are listed here.

The CEB and RB recognize that a “one size fits all” approach to a strict formulary is unrealistic due to medication availability, mission requirements, etc. The list of medications is designed to guide the ATP in medication selection.

For specific order of the recommended medications and specific TMEP application of the medications, CHECK the specific TME Protocol.

Antibiotics: Always check potential drug allergies. If allergic to one class of medications, use alternate class of medications (Cephalosporins/Penicillins, Tetracyclines, Quinolones, Macrolides).

Unless specifically noted, the drug dosages listed are for an adult.
